IT SOLUTIONS

Business Challenge

To club all services so that the user can select the appropriate service and apply.
Automatic alerts on application status change.
A dashboard depicting the status of application.
Online Payment option for user to avail services worldwide.
Online verification of certificates generated using QR code.
To generate reports for future strategic planning and management control.

Business Solutions

To facilitate user, admin and client, a sign up gateway was set-up.
A drop down menu was provided so that the users can view all services provided by the client.
For ease of doing business a dashboard was created for ensuring a time bound processing of the application.
The portal was integrated with an online payment gateway for timely availing of the services offered by the client.
For strategic planning and management purposes, plugins were added to generate reports for the client.
For authentication of certificates generated by the client for the user, a QR codes were infused to avoid any security breaches.
