

CASE STUDY

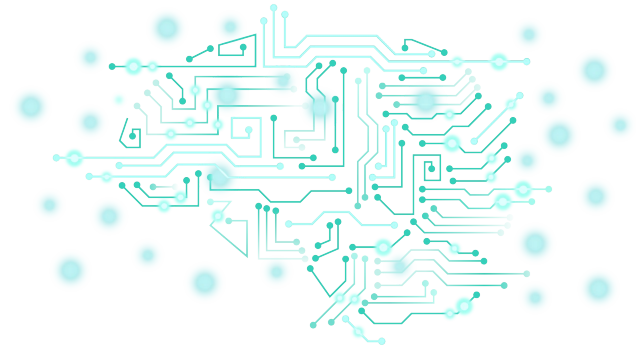

SINGLE WINDOW CLEARANCE SYSTEM

About Us

Netgen IT Solutions is a India based technology company serving global clients spread over Europe, USA, Australia and other geographies.

We specialise in Web Designing & Development, Website & Server Management, Product Development, and Mobile App Development.

The Client

The client was looking to create a Single Window Clearance system for applying, tracking and obtaining of permissions from various departments. The requirement needed to create a robust system with dynamic features.

Key Skills

- Created a portal with various forms modules to give access to maximum information for the user.
- Sending alerts to different departments as per application received.
- Payment gateway integration was done so that users can easily subscribe for needed services and permissions..
- Online Generation of permission letter for the user.
- To enhance user experience the portal was made web responsive so that users can use it on other gadgets too.
- The portal developed also had features like:
 - Automatic calculation of rates.
 - Admin access to add/exclude departments, rates etc.
 - Generating online permission letters to users.
 - Permission verification using QR code.
 - Dashboard depicting the average time taken to process an application received.
